

CICS V5.3 SYSTEMS TAILORING AND ADMINISTRATION

Course Code: 100308

Learn how to install, tailor, and administer your CICS Transaction Server (TS).

Learn how to install, tailor, and administer your CICS Transaction Server (TS) for z/OS. This included learning to construct, run, and administer a CICS system. You'll also tailor the system by configuring CICS to run applications, defining transactions, programs, files, web services, and other resources that CICS applications need. Finally, you'll administer CICS by using CICS transactions and the CICS Explorer.

The course provides a thorough introduction to security and recovery concepts that are needed to administer new or existing installations of CICS TS. Topics include resource management, storage management, system control, task management, measurement and problem determination tools, intercommunication services, CICSplex SM, Cloud, Liberty, DevOps, IBM UrbanCode Deploy, DB2, IBM MQ, DBCTL, and more. You'll practice your new skills on a z/OS system that is configured specifically for this lab-intensive course.

What You'll Learn

After completing this course, you will be able to:

- Define and set up CICS regions
- Analyze application descriptions, define resources, and customize
- Define the major functions and parameters that are used to control CICS
- Identify CICS procedures
- Identify system control functions
- Administer CICS resources with CICS transactions and the CICS Explorer
- Define the functions of intercommunication services
- Identify sources of information that is necessary to aid problem determination
- Measure and evaluate information that is used to measure and tune the environment
- Describe how the other MVS resource managers that IBM offers interface with CICS Transaction Server
- Describe the choices for starting CICS programs and accessing CICS data from outside CICS
- Describe how CICS uses z/OS Sysplex

Who Needs to Attend

Programmers, Developers, and Administrators

Prerequisites

- Be familiar with CICS architecture and facilities
- Have a working knowledge of z/OS, JCL, and TSO/ISPF
- Have a basic knowledge of z/OS Communications Server concepts
- Have a basic knowledge of VSAM concepts and Access Method services
