

GSEC: GIAC SECURITY ESSENTIALS CERTIFICATION

Course Code: 100373

Learn the most effective steps to prevent attacks and detect adversaries with actionable techniques while preparing for your GSEC certification

With so many security threats happening daily throughout the world, from loss of sensitive information to data breaches and malware, there is always a need for cybersecurity jobs. GIAC's Security Essentials Certification (GSEC) is a broad security certification many government agencies seek to ensure their staff has a solid understanding of security information. Agencies hold this type of certification at a higher value due to the in-depth technical knowledge you must possess. GSEC can help to open roles in many areas of security, including engineering and analysis, incident handling, and penetration testing, to name a few.

This course helps you prepare for the GSEC certification, covering all of the exam objectives as defined by GIAC, while further explaining security concepts and providing the history of security for a better overall understanding. You will receive a textbook, two practice exams, a test engine with customizable quizzes, and author videos.

What You'll Learn

- Networking fundamentals
- Network design
- Cloud computing
- Authentication and access control
- Unix/Linux
- Windows
- Encryption
- Risk management
- Virtual machines
- Vulnerability control
- Malware
- Incident response
- Wireless technologies
- Log Management
- IoT and embedded devices

Who Needs to Attend

Anyone who works in security, is interested in security, or has to understand security should take this course

- Security Analysts
- Security Engineers
- Security Administrators

Prerequisites

Must have a solid understanding of security information

GSEC: GIAC SECURITY ESSENTIALS CERTIFICATION

Course Code: 100373

VIRTUAL CLASSROOM LIVE

\$4,270 USD

5 Day

Virtual Classroom Live Outline

- Chapter 1: Information Security and the GIAC Seuciryt Essentials Certification
- Chapter 2: Networking Fundamentals
- Chapter 3: Network Design
- Chapter 4: Authentication and Access Control
- Chapter 5: Network Security
- Chapter 6: Linux
- Chapter 7: Windows
- Chapter 8: Encryption
- Chapter 9: Risk Management
- Chapter 10: Virtual Machines
- Chapter 11: Vulnerability Control
- Chapter 12: Malware
- Chapter 13: Physical Security
- Chapter 14: Wireless Technologies
- Chapter 15: VoIP

Jun 2 - 6, 2025 | 8:30 AM - 4:30 PM EDT

Sep 22 - 26, 2025 | 8:30 AM - 4:30 PM EDT

Nov 3 - 7, 2025 | 8:30 AM - 4:30 PM EST
