MAC INTEGRATION BASICS V14

Course Code: 100380

Learn how to integrate Mac computers into enterprise environments.

Organizations are increasingly integrating Mac computers into Windows or other standards-based network environments. But users and the IT professionals who support them can relax because Mac integration is easy.

What You'll Learn

- Integrate a Mac into a Windows network environment.
- Configure a Mac to work with Active Directory.
- Take advantage of network services: File Sharing, Printing, Instant Messaging, E-mail, Calendars, and Contacts.
- Provide security at the user, local-networking, and remote networking levels.
- Migrate data from a Windows computer to a Mac.
- Back up data.
- Run Windows programs on a Mac.

Who Needs to Attend

- Users who bring a Mac into organizations that predominantly use the Microsoft Windows operating system and Windows Server Essentials
- Users who replace a Windows computer with a Mac
- IT professionals who support Mac users in organizations that predominantly use Windows and Windows Server Essentials

Prerequisites

To have the best learning experience with this course, you should understand how to use a Mac, a Windows computer, and computer peripherals.
