

Course Code: 100479

Plan advanced designs for Cisco wireless networks and products.

The *ENWLSD - Designing Cisco Enterprise Wireless Networks v2.0* course prepares you to take the Designing Cisco Enterprise Wireless Networks (300-425 ENWLSD) exam which leads to the new CCNP Enterprise and Cisco Certified Specialist – Enterprise Wireless Design certifications. You will gain the knowledge you need to plan advanced designs of Cisco wireless products and qualify for professional-level job roles in wireless networking.

This course is eligible for 40 Continuing Education Credits (ILT & ELT Modality).

#### What You'll Learn

After taking this course, you should be able to:

- Describe and implement a Cisco-recommended structured design methodology
- Describe and implement industry standards, amendments, certifications, and Requests For Comments (RFCs)
- Describe and implement Cisco enhanced wireless features
- Describe and implement the wireless design process
- Describe and implement specific vertical designs
- Describe and implement site survey processes
- Describe and implement network validation processes

#### Who Needs to Attend

This course is for wireless engineers who work in the following roles:

- Consulting systems engineer
- Network administrator
- Network engineer
- Network manager
- Sales engineer
- · Systems engineer
- Technical solutions architect

- Wireless design engineer
- Wireless engineer

### Prerequisites

Before taking this course, you should have:

- General knowledge of networks
- General knowledge of wireless networks
- Routing and switching knowledge

Course Code: 100479

**CLASSROOM LIVE** 

\$5,585 CAD

5 Day

#### Classroom Live Outline

- Describing and Implementing a Structured Wireless Design Methodology

  - $\overline{\mathbb{N}}$  Cisco Design Guides and Cisco Validated Designs for Wireless Networks
  - $\overline{\mathbb{N}}$  Role of the Project Manager When Designing Wireless Networks
- Describing and Implementing Industry Protocols and Standards

  - Relevant Internet Engineering Task Force (IETF) Wireless RFCs
  - Practice Activity
- Describing and Implementing Cisco Enhanced Wireless Features
  - Mardware and Software Choices for a Wireless Network Design
- Examining Cisco Mobility and Roaming
  - Mobility and Intercontroller Mobility in a Wireless Network
  - Optimize Client Roaming in a Wireless Network
  - Cisco Workgroup Bridge (WGB) and WGB Roaming in a Wireless Network
- Describing and Implementing the Wireless Design Process
  - 🛮 Overview of Wireless Design Process
  - Meet with the Customer to Discuss the Wireless Network Design
  - □ Customer Information Gathering for a Wireless Network Design

- Design the Wireless Network
- □ Deployment of the Wireless Network
- ▼ Validation and Final Adjustments of the Wireless Network
- Describing and Implementing Specific Vertical Designs
  - □ Designs for Wireless Applications
- Examining Special Considerations in Advanced Wireless Designs

  - Introducing Location and Cisco Connected Mobile Experiences (CMX) Concepts
  - Design for Location
  - ∏ FastLocate and HyperLocation

  - Redundancy and High Availability in a Wireless Network
- Describing and Implementing the Site Survey Processes
  - Site Survey Types

  - ∏ Third-Party Site Survey Software and Hardware Tools
- Describing and Implementing Wireless Network Validation Processes

  - Making Post-installation Changes to a Wireless Network
  - M Wireless Network Handoff to the Customer

### Classroom Live Labs

- Use Cisco Prime Infrastructure as a Design Tool
- Create a Predictive Site Survey with Ekahau Pro
- Perform a Live Site Survey Using Access Point on a Stick (APoS)
- Simulate a Post-installation Network Validation Survey

Course Code: 100479

VIRTUAL CLASSROOM LIVE

\$5,585 CAD

5 Day

### Virtual Classroom Live Outline

- Describing and Implementing a Structured Wireless Design Methodology

  - Tisco Design Guides and Cisco Validated Designs for Wireless Networks
  - $\overline{\mathbb{N}}$  Role of the Project Manager When Designing Wireless Networks
- Describing and Implementing Industry Protocols and Standards
  - Mireless Standards Bodies

  - Relevant Internet Engineering Task Force (IETF) Wireless RFCs
  - Practice Activity
- Describing and Implementing Cisco Enhanced Wireless Features
  - Mardware and Software Choices for a Wireless Network Design
  - $\ \ \, \underline{\ \ } \ \,$  Cisco Infrastructure Settings for Wireless Network Design
- Examining Cisco Mobility and Roaming
  - Mobility and Intercontroller Mobility in a Wireless Network
  - Optimize Client Roaming in a Wireless Network
  - Cisco Workgroup Bridge (WGB) and WGB Roaming in a Wireless Network
- Describing and Implementing the Wireless Design Process

  - Meet with the Customer to Discuss the Wireless Network Design
  - Customer Information Gathering for a Wireless Network Design

- Design the Wireless Network
- □ Deployment of the Wireless Network
- ▼ Validation and Final Adjustments of the Wireless Network
- Describing and Implementing Specific Vertical Designs
  - □ Designs for Wireless Applications
- Examining Special Considerations in Advanced Wireless Designs

  - Introducing Location and Cisco Connected Mobile Experiences (CMX) Concepts
  - Design for Location
  - ∏ FastLocate and HyperLocation

  - Redundancy and High Availability in a Wireless Network
- Describing and Implementing the Site Survey Processes
  - Site Survey Types
- Describing and Implementing Wireless Network Validation Processes

  - Making Post-installation Changes to a Wireless Network
  - Mireless Network Handoff to the Customer

### Virtual Classroom Live Labs

- Use Cisco Prime Infrastructure as a Design Tool
- Create a Predictive Site Survey with Ekahau Pro
- Perform a Live Site Survey Using Access Point on a Stick (APoS)
- Simulate a Post-installation Network Validation Survey

Jun 23 - 27, 2025 | 8:30 AM - 4:30 PM EDT

Aug 4 - 8, 2025 | 8:30 AM - 4:30 PM EDT

Oct 6 - 10, 2025 | 8:30 AM - 4:30 PM EDT

Jan 19 - 23, 2026 | 8:30 AM - 4:30 PM EST

Course Code: 100479

ON-DEMAND

\$1,050 CAD

#### On-Demand Outline

- Describing and Implementing a Structured Wireless Design Methodology

  - $\overline{\mathbb{N}}$  Cisco Design Guides and Cisco Validated Designs for Wireless Networks
- Describing and Implementing Industry Protocols and Standards

  - Relevant Internet Engineering Task Force (IETF) Wireless RFCs
  - Practice Activity
- Describing and Implementing Cisco Enhanced Wireless Features
  - Mardware and Software Choices for a Wireless Network Design
  - $\ \ \, \underline{\ \ } \ \,$  Cisco Infrastructure Settings for Wireless Network Design
- Examining Cisco Mobility and Roaming
  - Mobility and Intercontroller Mobility in a Wireless Network
  - Optimize Client Roaming in a Wireless Network
  - Cisco Workgroup Bridge (WGB) and WGB Roaming in a Wireless Network
- Describing and Implementing the Wireless Design Process
  - 🛮 Overview of Wireless Design Process
  - Meet with the Customer to Discuss the Wireless Network Design
  - Customer Information Gathering for a Wireless Network Design

- Design the Wireless Network
- □ Deployment of the Wireless Network
- ▼ Validation and Final Adjustments of the Wireless Network
- Describing and Implementing Specific Vertical Designs
  - □ Designs for Wireless Applications
- Examining Special Considerations in Advanced Wireless Designs

  - Introducing Location and Cisco Connected Mobile Experiences (CMX) Concepts
  - Design for Location
  - ∏ FastLocate and HyperLocation

  - Redundancy and High Availability in a Wireless Network
- Describing and Implementing the Site Survey Processes
  - Site Survey Types
- Describing and Implementing Wireless Network Validation Processes

  - Making Post-installation Changes to a Wireless Network
  - M Wireless Network Handoff to the Customer

### On-Demand Labs

- Use Cisco Prime Infrastructure as a Design Tool
- Create a Predictive Site Survey with Ekahau Pro
- Perform a Live Site Survey Using Access Point on a Stick (APoS)
- Simulate a Post-installation Network Validation Survey
