

# ENWLSD - DESIGNING CISCO ENTERPRISE WIRELESS NETWORKS V2.0

Course Code: 100479

Plan advanced designs for Cisco wireless networks and products.

The *ENWLSD - Designing Cisco Enterprise Wireless Networks v2.0* course prepares you to take the Designing Cisco Enterprise Wireless Networks (300-425 ENWLSD) exam which leads to the new CCNP Enterprise and Cisco Certified Specialist - Enterprise Wireless Design certifications. You will gain the knowledge you need to plan advanced designs of Cisco wireless products and qualify for professional-level job roles in wireless networking.

This course is eligible for 40 Continuing Education Credits (ILT & ELT Modality).

## What You'll Learn

After taking this course, you should be able to:

- Describe and implement a Cisco-recommended structured design methodology
- Describe and implement industry standards, amendments, certifications, and Requests For Comments (RFCs)
- Describe and implement Cisco enhanced wireless features
- Describe and implement the wireless design process
- Describe and implement specific vertical designs
- Describe and implement site survey processes
- Describe and implement network validation processes

## Who Needs to Attend

This course is for wireless engineers who work in the following roles:

- Consulting systems engineer
- Network administrator
- Network engineer
- Network manager
- Sales engineer
- Systems engineer
- Technical solutions architect
- Wireless design engineer
- Wireless engineer

## Prerequisites

Before taking this course, you should have:

- General knowledge of networks
- General knowledge of wireless networks
- Routing and switching knowledge

# ENWLSD - DESIGNING CISCO ENTERPRISE WIRELESS NETWORKS V2.0

Course Code: 100479

CLASSROOM LIVE

\$4,295 USD

5 Day

## Classroom Live Outline

- Describing and Implementing a Structured Wireless Design Methodology
  - ☒ Importance of Planning Wireless Design with a Structured Methodology
  - ☒ Cisco Structured Design Model
  - ☒ Cisco Design Guides and Cisco Validated Designs for Wireless Networks
  - ☒ Role of the Project Manager When Designing Wireless Networks
- Describing and Implementing Industry Protocols and Standards
  - ☒ Wireless Standards Bodies
  - ☒ Institute of Electrical and Electronics Engineers (IEEE) 802.11 Standard and Amendments
  - ☒ Wi-Fi Alliance (WFA) Certifications
  - ☒ Relevant Internet Engineering Task Force (IETF) Wireless RFCs
  - ☒ Practice Activity
- Describing and Implementing Cisco Enhanced Wireless Features
  - ☒ Hardware and Software Choices for a Wireless Network Design
  - ☒ Cisco Infrastructure Settings for Wireless Network Design
  - ☒ Cisco Enhanced Wireless Features
- Examining Cisco Mobility and Roaming
  - ☒ Mobility and Intercontroller Mobility in a Wireless Network
  - ☒ Optimize Client Roaming in a Wireless Network
  - ☒ Cisco Workgroup Bridge (WGB) and WGB Roaming in a Wireless Network
- Describing and Implementing the Wireless Design Process
  - ☒ Overview of Wireless Design Process
  - ☒ Meet with the Customer to Discuss the Wireless Network Design
  - ☒ Customer Information Gathering for a Wireless Network Design
  - ☒ Design the Wireless Network
  - ☒ Deployment of the Wireless Network
  - ☒ Validation and Final Adjustments of the Wireless Network

- ☒ Wireless Network Design Project Documents and Deliverables
- Describing and Implementing Specific Vertical Designs
  - ☒ Designs for Wireless Applications
  - ☒ Wireless Network Design Within the Campus
  - ☒ Extend Wireless Networks to the Branch Sites
- Examining Special Considerations in Advanced Wireless Designs
  - ☒ High-Density Designs in Wireless Networks
  - ☒ Introducing Location and Cisco Connected Mobile Experiences (CMX) Concepts
    - ☒ Design for Location
    - ☒ FastLocate and HyperLocation
    - ☒ Bridges and Mesh in a Wireless Network Design
    - ☒ Redundancy and High Availability in a Wireless Network
- Describing and Implementing the Site Survey Processes
  - ☒ Site Survey Types
  - ☒ Special Arrangements Needed for Site Surveys
  - ☒ Safety Aspects to be Considered During Site Surveys
  - ☒ Site Survey Tools in Cisco Prime Infrastructure
  - ☒ Third-Party Site Survey Software and Hardware Tools
- Describing and Implementing Wireless Network Validation Processes
  - ☒ Post-installation Wireless Network Validation
  - ☒ Making Post-installation Changes to a Wireless Network
  - ☒ Wireless Network Handoff to the Customer
  - ☒ Installation Report

## Classroom Live Labs

- Use Cisco Prime Infrastructure as a Design Tool
- Create a Predictive Site Survey with Ekahau Pro
- Perform a Live Site Survey Using Access Point on a Stick (APoS)
- Simulate a Post-installation Network Validation Survey
