

# CITRIX NETWORKING ASSESSMENT, DESIGN, AND ADVANCED CONFIGURATION (CNS-420)

Course Code: 100705

You will learn advanced networking and Citrix ADC concepts and configurations.

In this expert level 5-day training course you will be exposed to advanced networking and Citrix ADC concepts and configurations. Through lecture, lab exercises and real-world case studies, you will learn to look critically at environment requirements, constraints, and business drivers to create a complex Citrix networking solution.

Topics to be covered in this course include multi-site and multitenant deployments, advanced authentication and load balancing and automation and orchestration and advanced troubleshooting. This training will also prepare you for the Citrix Certified Expert in Networking (CCE-N) exam.

## What You'll Learn

- How to identify and prioritize business drivers, constraints and requirements using the Citrix Consulting methodology.
- Assess environment requirements and learn to apply leading design principles to address them in a multi- site Citrix ADC deployment.
- Apply advanced authentication and load balancing principles.

## Who Needs to Attend

Built for IT Professionals with extensive networking and Citrix ADC experience. This course is built for IT Professionals who are responsible for defining the overall structure or architecture of a Citrix networking environment. This course encompasses advanced Citrix networking configurations and leading Citrix design principles

## Prerequisites

This course assumes that the student has significant networking and Citrix Networking experience. Citrix recommends a comprehensive understanding of

basic and intermediate Citrix ADC features and functionalities. Proficiency in the topics covered in CNS 220, CNS 222 and CNS-320 is strongly recommended.
