

RED HAT® LEARNING SUBSCRIPTION – DEVELOPER (LS300)

Course Code: 100888

Red Hat® Learning Subscription Developer was designed with developers in mind. A single, annual subscription delivers access to all Red Hat Training courses for developers, including content on Red Hat OpenShift®, Red Hat Middleware, and containers. Through a dynamic, online learning platform including video classroom courses, e-books, and hands-on labs, developers have access to 24x7 training that is delivered on-demand, at their own pace, and in up to 9 languages.

For developers, it is difficult to make time for full-day training courses. Developers need access to answers as problems arise—and on-demand content as schedules allow. Developers need training that is immediately available, prescriptive, and reliable. The industry is evolving rapidly—as are software releases and best practices. As a result, online resources quickly become out of date. Red Hat® Training provides continuously updated content straight from the source to help you keep pace.

This single, annual subscription delivers access to all Red Hat Training courses for developers, including content on Red Hat OpenShift®, Red Hat Middleware, and containers. Through a dynamic, online learning platform including video classroom courses, e-books, and hands-on labs, developers have access to 24x7 training that is delivered on-demand, at their own pace, and in up to 9 languages.

What You'll Learn

Get on-the-job support:

- Easily searchable content to help quickly answer questions on cloud-native technologies, microservices, and migrating existing applications.
- Quick lab access to already set-up, hands-on environments with detailed steps.
- New and updated courses are added to the subscription as they are released.
- On-demand access, worldwide, 24 hours a day, 7 days per week.
- Early access to courses and labs currently in development, including content on new product versions and releases.

Build your skills:

- No prerequisite level of expertise required, allowing you to build your skills on

cloud-native technologies or development, regardless of your level.

- Track progress toward training and certification goals.
- Train offline with up to 10 e-book downloads.

Become Red Hat certified:

- Get certified in up to three Red Hat certifications with three exam attempts.
- Verify your skills with Red Hat application development through certification.

Who Needs to Attend

This course is designed for developers, architects, and product owners. If you're a product owner with no programming experience, you will be paired with a student developer to help you through the labs.
