

PROBLEM SOLVE AND GENERATE SOLUTIONS

Course Code: 100928

Tackle business problems as they arise and overcome traditional thinking.

This full day live instructor-led class will teach participants how to identify characteristics of an effective problem solver, challenge their go-to problem solving habits, inspire them to be more creative and give a variety of diagrams to help you develop creative problem-solving methods. As a result, people will be able to overcome traditional thinking patterns, have more confidence in their ability to handle problems as they arise, and be able to assess the impact of possible solutions.

What You'll Learn

- Identify roadblocks that prevent creative thinking
- Develop creative attitudes and learn to see that all problems have opportunities
- Rediscover your creative ability
- Focus and direct creative efforts
- Overcome criticism and gain acceptance for new ideas
- Learn creative and effective techniques to recognize and identify problems
- Explore techniques for managing creative people
- Realize the significance of humor and how it impacts creativity

Who Needs to Attend

All business professionals who want to learn creative problem solving methods.
