

DRIVING ACCOUNTABILITY: BUILDING OWNERSHIP AND FOLLOW-THROUGH

Course Code: 101138

A practical guide for leaders who want to foster ownership, clear expectations, and consistent performance across their teams

Driving Accountability: Building Ownership and Follow-Through is a results-driven program designed to help leaders cultivate a workplace culture where individuals take ownership of their actions, commitments, and outcomes. In this course, participants learn the core principles of accountability—setting clear expectations, communicating effectively, providing constructive feedback, and addressing performance gaps with confidence and fairness. Through interactive discussion and real-world scenarios, leaders discover how accountability strengthens team trust, improves follow-through, and drives measurable results.

This course also explores the mindsets and behaviors that support accountability on both sides of the leadership equation. Participants learn how to model accountability themselves, create transparent processes, eliminate ambiguity, and motivate employees to rise to shared goals. By the end of the program, leaders walk away with practical tools for fostering responsibility, navigating difficult conversations, and building a team culture where people feel empowered, aligned, and committed to delivering their best work.

What You'll Learn

- Define what accountability means in a modern workplace and why it drives results.
- Establish and communicate clear expectations, standards, and performance metrics.
- Use effective communication strategies to reinforce accountability consistently.
- Hold constructive accountability conversations while minimizing defensiveness.
- Diagnose performance issues and identify root causes.
- Apply tools for fostering ownership, self-management, and follow-through.
- Strengthen team trust and alignment through transparency and clarity.
- Create a sustainable culture of accountability through leadership modeling and systems.

Who Needs to Attend

This course is ideal for supervisors, managers, team leads, project managers, HR professionals, and emerging leaders who are responsible for guiding employee

performance, setting expectations, and cultivating a culture of responsibility and results within their teams or organizations.

Prerequisites

Participants should have a basic understanding of workplace roles and team dynamics, along with experience collaborating on projects or meeting deadlines. A willingness to reflect on personal habits, accept feedback, and commit to improving ownership and follow-through will help participants fully benefit from the course.
