

PMI AGILE CERTIFIED PRACTITIONER (PMI-ACP) BOOT CAMP

Course Code: 111226

PMI-ACP training will prepare you to become an Agile Certified Practitioner, the industry standard for those who lead Agile software projects.

Agile has made its way into the mainstream – it's no longer a grassroots movement to change software development. Today, more organizations and companies are adopting this approach over a more traditional waterfall methodology, and more are working every day to make the transition. To stay relevant in the competitive, professional world, it's increasingly important that professionals can demonstrate true leadership ability on today's software projects. The Project Management Institute's Agile Certified Practitioner (PMI-ACP) certification clearly illustrates to colleagues, organizations or even potential employers that you're ready and able to lead in this new age of product development, management and delivery.

This PMI-ACP exam prep training not only prepares you to lead your next Agile project effort, but ensures that you're prepared to pass the PMI-ACP certification exam. This course provides a proven combination of class learning and testing that prepares students for some of the most difficult of testing situations. Questions are designed to allow you to learn through practice so that you will be able to apply what you have learned for the exam.

PMI, PMI-ACP, PMP and PgMP are registered marks of the Project Management Institute, Inc.
