

# RED HAT CERTIFIED ENGINEER (RHCE) EXAM (EX300)

Course Code: 1284

The RHCE exam is a performance-based evaluation of Red Hat Enterprise Linux system administration skills and knowledge. Candidates perform a number of routine system administration tasks and are evaluated on whether they have met specific objective criteria. Performance-based testing means that candidates must perform tasks similar to what they must perform on the job.

**Note:** Global Knowledge and Red Hat do not guarantee that anyone who takes one or all of the courses in the Red Hat certification program will pass a Red Hat exam. On-the-job experience, in combination with high-quality training, is the best way to build skills and prepare for a Red Hat exam. The exam itself is a hands-on learning experience, and many of those who do not pass on the first try come away with knowledge of what they need to work on to pass the exam on a re-take.

## Who Needs to Attend

- RHCEs who were certified on Red Hat Enterprise Linux version 4, 5 or 6
- Current RHCSAs
- Linux IT professionals who can demonstrate the competencies needed to earn an RHCE but have not taken the RHCE
- Solaris administrators with more than three years of experience
