

IMPLEMENTING RED HAT JBOSS BRMS (AD465)

Course Code: 1769

This course combines content from both *Authoring Rules with Red Hat JBoss BRMS (JB461)* and *Developing Rules Applications with Red Hat JBoss BRMS (JB463)*. It teaches business analysts, rule developers, and Java™ enterprise application developers how to create, test, debug, and control business rules.

You will be given detailed, hands-on exercises using Red Hat JBoss Developer Studio and Red Hat JBoss BRMS that are designed to let you create and manage business rules in a production environment. This course can also help you prepare for the Red Hat Certificate of Expertise in Business Rules Management Exam (EX465).

Note: Global Knowledge and Red Hat do not guarantee that anyone who takes one or all of the courses in the Red Hat certification program will pass a Red Hat exam. On-the-job experience, in combination with high-quality training, is the best way to build skills and prepare for a Red Hat exam. The exam itself is a hands-on learning experience, and many of those who do not pass on the first try come away with knowledge of what they need to work on to pass the exam on a re-take.

What You'll Learn

- Authoring basic business rules in JBoss Developer Studio and Business Central
- Integrating business rules with Java applications
- Authoring advanced rules
- Testing business rules
- Authoring and testing rules in decision tables
- Authoring rule templates and generating rules from decision tables
- Authoring domain-specific languages
- BRMS architecture and rule execution at run time
- Controlling rule execution and preventing conflicts
- Complex event processing (CEP)
- Integration with Business Central

Who Needs to Attend

- Business analysts and enterprise SOA architects who are responsible for creating and adapting business policies.
- Rule authors responsible for authoring and testing rules.
- Java EE application developers responsible for integrating business rules into SOA and Java EE enterprise applications
