CLOUD ADMINISTRATOR

Course Code: 2018

Gain the knowledge and skills needed to effectively operate in the cloud and learn all the aspects of administering cloud services.

The interaction between a cloud environment and the existing network/administrative policies is one of the most challenging management issues to resolve. This is the domain of cloud administrators. They configure and maintain the cloud platform, and they have to understand and master all aspects regarding cloud provisioning.

This course provides network, systems, and database administrators the knowledge and skills needed to effectively operate in the cloud and touches upon all the aspects of administering cloud services. The training covers best practices on cloud administration, supported by many vendor technology solutions, covering open source and major vendor standards. This is a professional-level course and relevant to professionals with at least two years of experience as an administrator. The course prepares you for the Professional Cloud Administrator (PCA) certification.

What You'll Learn
