

Course Code: 2206

Learn about the tools needed to manage Green Belt-level projects.

Lean Six Sigma Green Belt is training for process improvement leaders and provides a working knowledge of the Lean Six Sigma roadmap to lead projects focused on the analytical methods typically used for process optimization. The focus of the projects, at this level of proficiency, is typically on stabilizing the process - getting rid of the firefighting mentality and having consistent performance. Note that this may not be optimal performance, but significantly reduced volatility.

A project Certification is required to become a Certified Lean Six Sigma Green Belt and this project is a real process improvement that the candidates choose to implement for their current employer.

**Note:** The Lean Six Sigma Green Belt Live Instructor course is scheduled as an eight-day course taking place from Tuesday to Friday from 10 am to 4 pm Eastern Time on two separate weeks. The available class dates show the first and last day of the course. For example, a class date of January 14, 2025 & February 11, 2025 means that the first week of class is Tuesday January 14 thru Friday, January 17; and the second week of class is Tuesday, February 11 thru Friday, February 14.

**Note:** The Lean Six Sigma Green Belt On-Demand course takes about 40 hours of training with 1-year access to complete it at your own pace. This is a self-paced format with 24/7 access, fully online, and you need an internet connection. You can register and start training whenever you want. There is no live engagement with the instructor during the training portion, but you have an email where you can ask questions for follow-up if necessary. Remote mentoring time for the project certification is included.

#### What You'll Learn

- Acquire the knowledge obtained from the White and Yellow Belt
- Select Lean Six Sigma projects
- Mobilize a Lean Six Sigma team and organize its work
- Proficiently use statistical tools to analyze process metrics
- Complete Lean Six Sigma projects by utilizing charts, process maps,

## prioritization tools, and control plans

### Who Needs to Attend

The Lean Six Sigma Green Belt program is ideal for professionals looking to improve existing processes, and advance their careers.

## Prerequisites

The Lean Six Sigma Green Belt program does not have prerequisites as White and Yellow Belt concepts are covered. Additionally, Minitab Statistical software is required.

Course Code: 2206

**CLASSROOM LIVE** 

\$2,950 USD

9 Day

### Classroom Live Outline

- Lean Six Sigma Program Overview
- Define Phase
- Lean Six Sigma Deployment
- Process Variables Mapping
- Causes and Effects Matrix
- Failure Mode Effect Analysis (FMEA)
- Waste Identification & Methods to Reduce Waste
- Introduction to Statistics and Graphical Analysis
- Introduction to Statistics and Graphical Analysis with software Minitab
- Introduction to Statistical Process Control (SPC)
- Measurement System Analysis (MSA)
- Introduction to Capability Studies
- Multi-Vari Studies
- Hypothesis Tests
- T-Test / ANOVA
- Project Presentations
- Correlation & Regression
- Chi-Square
- Multi-Vari Case Study
- Intro to DOE
- Mistake Proofing
- Process Control Plans
- Project Documentation

8 Day

#### Virtual Classroom Live Outline

- Lean Six Sigma Program Overview
- Define Phase
- Lean Six Sigma Deployment
- Process Variables Mapping
- Causes and Effects Matrix
- Failure Mode Effect Analysis (FMEA)
- Waste Identification & Methods to Reduce Waste
- Introduction to Statistics and Graphical Analysis
- Introduction to Statistics and Graphical Analysis with software Minitab
- Introduction to Statistical Process Control (SPC)
- Measurement System Analysis (MSA)
- Introduction to Capability Studies
- Multi-Vari Studies
- Hypothesis Tests
- T-Test / ANOVA
- Project Presentations
- Correlation & Regression
- Chi-Square
- Multi-Vari Case Study
- Intro to DOE
- Mistake Proofing
- Process Control Plans
- Project Documentation

Feb 17 - Mar 20, 2026 | 10:00 AM - 4:00 PM EST

Mar 10 - Apr 10, 2026 | 10:00 AM - 4:00 PM EST

Mar 31 - May 1, 2026 | 10:00 AM - 4:00 PM EST

May 5 - Jun 5, 2026 | 10:00 AM - 4:00 PM EDT

Jun 9 - Jul 10, 2026 | 10:00 AM - 4:00 PM EDT

Jul 14 - Aug 14, 2026 | 10:00 AM - 4:00 PM EDT

Aug 18 - Sep 18, 2026 | 10:00 AM - 4:00 PM EDT

Sep 8 - Oct 9, 2026 | 10:00 AM - 4:00 PM EDT

Sep 29 - Oct 27, 2026 | 10:00 AM - 4:00 PM EDT

Course Code: 2206

**ON-DEMAND** 

\$1,095 USD

#### On-Demand Outline

- · Lean Six Sigma Overview
- Define Phase and Project Selection
- Lean Six Sigma Deployment
- Process Variables Mapping
- Causes and Effects Matrix
- Failure Modes & Effects Analysis
- · Waste Identification and Recommended Actions
- Introduction to Statistics
- Introduction to Graphical Analysis with Minitab or SigmaXL
- Introduction to Statistical Process Control
- Measurement Systems Analysis
- Introduction to Capability
- Multi-Vari Studies
- Hypothesis Testing
- Roadmaps for Comparing Groups t-Test and One-Way ANOVA
- Correlation and Regression Analysis
- Chi-square Test Proportion Comparisons
- Multi-Vari Exercise
- Introduction to Design of Experiments
- Mistake Proofing
- Process Control Plans
