

SDN ESSENTIALS

Course Code: 3327

Discover what SDN is and how it changes network services, applications, and roles within an organization.

SDN empowers the business to control network behavior by emphasizing the software application instead of the network infrastructure. In this interactive course, you will learn what SDN is and how it is rapidly changing networking.

This vendor-neutral course provides an open discussion on how SDN can:

- Allow more efficient provisioning of new services and applications
- Affect your role in your organization
- Reduce configuration time and errors
- Enhance security
- Enhance cloud computing

What You'll Learn

- SDN and its impact in the industry
- Business and technical challenges that SDN solves
- How SDN enhances cloud computing
- How SDN impacts your organization, your team, and you

Who Needs to Attend

Those interested in a high-level understanding of what SDN is and how it will change your business and the networking landscape
