KORN AND BASH SHELL PROGRAMMING

Course Code: 3663

Learn to use Korn and Bash shell scripts and utilities

This course will teach you how to use shell scripts and utilities for practical system administration of AIX (or other UNIX) operating systems.

What You'll Learn

After completing this course, you should be able to:
• Distinguish Korn and bash shell specific features
• Use utilities such as sed and awk to manipulate data
• Understand system shell scripts such as /etc/shutdown
• Write useful shell scripts to aid system administration

Who Needs to Attend

This course is for support staff for AIX on POWER systems

Prerequisites

You should have:

• An understanding of programming fundamentals: variables, flow control concepts such as repetition **and**
• A working knowledge of AIX including the use of the vi editor, find and grep commands.

Students without this experience should attend *AIX Basics*
