

LEADING INNOVATION

Course Code: 4518

Go beyond brainstorming and discover how to properly lead all types of innovation using the right leadership skills and behaviors.

In today's complex and competitive business environment, most companies rank innovation as one of their top strategic priorities. In a recent study conducted by the Boston Consulting Group, more than three quarters of business leaders surveyed ranked innovation as their top—or one of their top three—strategic priorities.

The challenge is that many organizations struggle to truly innovate. Often they are restricted by a narrow definition of innovation or are limited by thinking of innovation relative to their industry or competitors.

This one-day workshop helps leaders properly implement or support real innovation.

What You'll Learn

- Definition of “Innovation” and “Innovation Value Chain”
- Cultural aspects that enable innovation
- Characteristics of innovative organizations
- The elements of an innovation-friendly environment
- How to assess organizational readiness for innovation
- Steps in the innovation process and the 12 ways an organization can innovate
- How to demonstrate the leadership behaviors required to encourage and lead innovation

Who Needs to Attend

Leaders at all levels: vice presidents, directors, managers, and supervisors

Prerequisites

Pework for this course should be completed one week in advance and brought to class.

Foundational people management is recommended but not required.

Though not a formal prerequisite, we strongly recommended students complete complete Active Leadership for IT Professionals (8944).
