# PALO ALTO NETWORKS: FIREWALL ESSENTIALS: 9.0- CONFIGURATION AND MANAGEMENT

Course Code: 5846

Learn how to configure and manage Palo Alto Networks next-generation firewalls.

With the launch of the PAN-OS 9.0 courses, all EDU-210 courseware will now be bundled with a PCNSA exam voucher to give all EDU-210 students the opportunity to become certified after completing the course.

This five-day, instructor-led training course will enhance the student's understanding of how to configure and manage Palo Alto Networks next-generation firewalls. The student will learn and get hands-on experience configuring, managing, and monitoring a firewall in a lab environment.

This course will enable you to:

- Configure and manage the essential features of Palo Alto Networks next-generation firewalls
- Configure and manage GlobalProtect to protect systems that are located outside of the data center perimeter
- Configure and manage firewall high availability
- Monitor network traffic using the interactive web interface and firewall reports

Customer spotlight:

Global Knowledge's Palo Alto Networks training courses helped a system administrator from California successfully migrate and maintain two firewalls for his organization. [See Dane's story.](#)

What You'll Learn

The Palo Alto Networks: Firewall 9.0: Essentials - Configuration and Management course is five days of instructor-led training that will enable you to:

- Configure and manage the essential features of Palo Alto Networks next-generation firewalls
- Configure and manage GlobalProtect to protect systems that are located outside of the data center perimeter
- Configure and manage firewall high availability
- Monitor network traffic using the interactive web interface and firewall reports

### Who Needs to Attend

- Security Engineers
- Security Administrators
- Security Operations Specialists
- Security Analysts
- Network Engineers
- Support Staff

### Prerequisites

Students must have a basic familiarity with networking concepts including routing, switching, and IP addressing. Students also should be familiar with basic security concepts. Experience with other security technologies (IPS, proxy, and content filtering) is a plus.

CLASSROOM LIVE

\$5,000 CAD

5 days

## Classroom Live Outline

Module 1: Security Platform and Architecture

Module 2: Initial Configuration

Module 3: Interface Configuration

Module 4: Security and NAT Policies

Module 5: App-ID

Module 6: Content-ID

Module 7: URL Filtering

Module 8: Decryption

Module 9: WildFire

Module 10: User-ID

Module 11: GlobalProtect

Module 12: Site-to-Site VPNs

Module 13: Monitoring and Reporting

Module 14: Active/Passive High Availability

Module 15: Security Practices
