

# MICROSOFT ACCESS 2016 - LEVEL 1 / INTRO

Course Code: 6654

Learn to use Microsoft Access 2016 to manage your data, construct tables, design forms and reports, and more.

Microsoft® Office Access® 2016 can help you and your organization collect and manage large amounts of data. You can use it as a personal data management tool, or you can use it to develop applications for a department or an entire organization. In this course, you will use Access 2016 to manage your data by creating a new database; constructing tables; designing forms and reports; and creating queries to join, filter, and sort data.

## What You'll Learn

In this course, you will learn how to use Access 2016 to manage your data by creating a new database; constructing tables; designing forms and reports; and creating queries to join, filter, and sort data.

## Who Needs to Attend

Students taking this course are database administrators or prospective database administrators who have experience working with Access 2016 and need to learn advanced skills.

## Prerequisites

To ensure your success in this course, you should have end-user skills with any current version of Windows, including being able to start programs, switch between programs, locate saved files, close programs, and use a browser to access websites.
