

# MICROSOFT PROJECT 2016 - LEVEL 1 / INTRO

Course Code: 6685

Learn to create and manage a project schedule using Microsoft® Project 2016.

This course is designed to familiarize you with the basic features and functions of Microsoft Project Professional 2016, so you can use it effectively and efficiently in a real-world environment.

This course covers the critical knowledge and skills a project manager needs to create a project plan with Project 2016 during the planning phase of a project.

## What You'll Learn

In this course, you will learn to create and engage in basic management of a project using Microsoft Project Professional 2016.

You will:

- Identify project management concepts and navigate the Project 2016 environment
- Create and define a new project plan
- Create and organize tasks
- Manage resources in a project plan
- Finalize a project plan

## Who Needs to Attend

This course is designed for a person who has an understanding of project management concepts, is responsible for creating and modifying project plans, and needs a tool to manage those project plans.

## Prerequisites

Students enrolling in this class should have the following:

- A general introductory-level understanding of project management concepts
- End-user skills with the current Windows operating system
- Proficient skills using Microsoft Office products
