CLASSROOM LIVE

\$355 USD

1 Day

Classroom Live Outline

Understanding Pivot Tables

- Types of Pivot Table reports
- Source data for Pivot Table reports
- Creating Worksheet Lists

Using Names

- Create a Name
- Using a Name in a Formula
- Creating Names for a Multiple Rows or Columns
- Creating Names for a Value or Formula

Creating a Pivot Table

- Pivot Table Field List
- Completing the Report
- Pivot Table Tools
- Rearranging the Pivot Table
- Changing the Report Field Titles
- Formatting Data Fields

Using the Report Filter

- Displaying Filtered Fields on Separate Worksheets

Formatting the Pivot Table

- Sorting Data
- Removing Data
- Refreshing Data

Using Formulas Functions

- Create a Calculated Field

- Create implicit calculated fields (previously called 'measures')
- Add or remove subtotals in a Pivot Table report
- Display Or Hide Details

Working with Multiple Data Ranges

- Setting up the source data
- Using named ranges when source data is likely to expand

Creating PivotCharts

- Creating the Chart
- Moving the Chart to a New Worksheet
- Chart Tools
- Using Pivot Table Data Outside The Pivot Table Report
- Create relationships between data from different sources,
- and between multiple tables in a PivotTable.

Creating a Pivot Table from a Database

- Databases you can access
- Refreshing the Data

Publishing an Excel Workbook

- When to Use Excel Services
