

# SHAREPOINT 2016 FOR SITE MEMBERS, SITE OWNERS AND WORKFLOW ADMIN

Course Code: 6903

Learn how to determine what features and options to make available in SharePoint and how to configure those features to meet organizational and user needs.

Microsoft® SharePoint® 2016 helps people collaborate and use familiar applications and web-based tools to create, access, store, and track documents and data in a central location. SharePoint can also help organizations segment digital information, share information from external sources, archive records, and automate business processes. In this course, you will learn how to create, configure, and manage a SharePoint site so that your team or organization can collaborate effectively, manage the flow of digital information, automate business processes, and meet records management needs.

SharePoint is a complex platform with many features and capabilities. A strong understanding of those features and capabilities will allow you to work more efficiently and effectively with SharePoint and with the documents and data stored in SharePoint. Furthermore, effective use of new social networking capabilities will allow you to identify, track, and advance issues and topics most important to you while collaborating with colleagues more effectively.

## What You'll Learn

After this five-day course, you will be able to use resources on a typical SharePoint Team Site in the course of performing normal business tasks. You will be able to create a SharePoint team site and perform basic content management tasks on a single SharePoint site. As existing SharePoint site owners will be able to take on administrative responsibility for implementing and managing advanced features based on business requirements.

## Who Needs to Attend

This course is designed for existing Microsoft SharePoint site owners who will create and manage sites, add advanced features, implement and manage records management, and create and administer workflows.

## Prerequisites

To ensure your success, you will need to have a solid understanding of computers, the Windows Operating system, file management and functional knowledge of Microsoft Office.
