DEVELOPING RULES APPLICATIONS WITH RED HAT JBOSS BRMS (AD463)

Course Code: 6929

In this course, you will learn to create, test, debug, and control business rules, how to generate rules packages, and how the Red Hat JBoss BRMS [business rules management system] runtime environment executes rules. You will use Red Hat JBoss Developer Studio 7 and Red Hat JBoss BRMS 6 to perform detailed, hands-on exercises that enable you to create and manage business rules in a production environment.

What You'll Learn

- Authoring basic business rules in Red Hat JBoss Developer Studio
- Authoring advanced rules
- Testing and debugging business rules
- Using spreadsheet decision tables
- Authoring and using DSL mapping files
- Red Hat JBoss BRMS architecture and runtime rule execution
- Controlling rule execution and preventing conflicts
- Complex event processing (CEP)

Who Needs to Attend

- Rule authors responsible for authoring and testing rules, using Red Hat JBoss Developer Studio
- Java application developers responsible for developing and integrating business rules into Java and Java EE enterprise applications
