DEVELOPING CLOUD NATIVE APPLICATIONS MICROSERVICES (DO092)

Course Code: 7398

Identify the proper frameworks and tools to build your microservices architecture.

Developing Cloud-Native Applications with Microservices Architectures (DO092) is a series of on-demand, online videos that will teach you how to combine different frameworks and tools into a microservices architecture that fits your organizational needs.

What You'll Learn

You've no doubt heard about the microservices architecture, but understanding and executing it can be a bit of a challenge. Through a series of videos, this course will introduce microservices, review multiple microservices frameworks and runtimes, and show you techniques to deploy them through a hassle-free DevOps pipeline. We'll discuss containers, Docker, Spring Boot, NodeJS, .NET, OpenShift, Jenkins, Vert.x, Kubernetes, and much more.

Who Needs to Attend

Java™ developers and anyone interested in OpenShift and Kubernetes
