

BLOCKCHAIN ARCHITECTURE TRAINING

Course Code: 7882

Learn about Blockchain and the architectural and technical considerations for your implementation.

This course reviews the Blockchain architectural and technical topics that must be considered before launching a Blockchain development program. There are many decisions and issues that face the technical project team and this class will enable participants to make those decisions.

Learn more about this topic now. View the webinar [Blockchain 101 – Overview and Use Cases](#)

What You'll Learn

- What is Blockchain
- How does Blockchain work
- Types of Blockchains
- How is Blockchain different from what we have today
- What are use cases for Blockchain
- What does a Blockchain app look like
- How do I design a Blockchain app
- How do I develop a Blockchain app
- How do I test a Blockchain app

Who Needs to Attend

Architects and Technical leaders Leaders who make technical decisions about their architecture, environments, and development platforms.
