

SERVICENOW FIELD SERVICE MANAGEMENT (FSM) FUNDAMENTALS

Course Code: 821235

Learn how ServiceNow® Field Service Management (FSM) makes integrated and proactive service possible.

Create work order requests using a variety of methods, qualify work order requests to ensure all relevant information is captured before a field agent is dispatched, and use drag and drop to match tasks to field agents based on location, schedules, skills, and available inventory. Use the mobile user interface to perform task work on location, with or without an internet connection.

In this self-paced, on demand course, attendees master the usage of ServiceNow Field Service Management applications and modules. This course is designed for field service process users or fulfillers who will use the Field Service application and modules, as well as administrators or implementers responsible for configuring or maintaining the Field Service application and modules. A combination of process overviews, use cases, how-to steps, demonstration videos, and simulations helps attendees develop a holistic view of the core field service persona roles and responsibilities.

What You'll Learn

Students will learn to,

- Define Field Service
- Identify the types of Field Service and the four Field Service models
- Identify Field Service Management process lifecycle phases and personas
- Create Work Order Requests
- Qualify Work Order Tasks
- Describe geolocation and its benefits when using ServiceNow Field Service Management
- Create and manage team schedules and skills
- Dispatch Work Order Tasks
- Update and close Work Order Tasks
- Summarize Field Service Reporting and Performance Analytics capabilities

Who Needs to Attend
