

PALO ALTO NETWORKS: PRISMA ACCESS SASE SECURITY: DESIGN AND OPERATION (EDU-318)

Course Code: 821422

The Prisma Access SASE Security: Design and Operation (EDU-318) course describes Panorama Managed Prisma Access Secure Access Service Edge (SASE) and how it helps organizations embrace cloud and mobility by providing network and network security services from the cloud. This course is intended for people in the fields of public cloud security and cybersecurity, or for anyone who wants to learn how to secure remote networks and mobile users.

Successful completion of this four-day, instructor-led course will help enhance your understanding of how to better protect your applications, remote networks, and mobile users using a SASE implementation. You will get hands-on experience configuring, managing, and troubleshooting Prisma Access in a lab environment.

What You'll Learn

You will learn how to secure your networks using a SASE implementation including hands-on experience configuring, managing, and troubleshooting Prisma Access in a lab environment.

Who Needs to Attend

Security Engineers, Security Administrators, Security Operations Specialists, Security Analysts, and Network Engineers

Prerequisites

Participants should have a basic knowledge of cloud computing and the public cloud.

Participants must complete the GK 5846 Firewall Essentials: Configuration and Management course (EDU-210) and the GK 9798 Panorama: Managing Firewalls at Scale course (EDU-220) or have equivalent experience. Participants also must have experience with networking concepts including routing, switching, and IP addressing.
