DEVELOPING DATA MODELS WITH LOOKML

Course Code: 821458

Learn intermediate-level training that introduces the fundamentals of LookML.

This Developing Data Models with LookML course is an intermediate-level training that introduces the fundamentals of LookML for Looker developers and provides guided demos and hands-on practice with writing LookML code.

What You'll Learn

Upon completion of the Developing Data Models with LookML course, students will be able to:

- Define LookML basic terms and building blocks
- Use the Looker Integrated Development Environment (IDE) and project version control to modify LookML projects
- Create dimensions and measures to curate data attributes used by business users
- Create and design Explores to make data accessible to business users
- Use derived tables to instantaneously create new tables
- Use caching and datagroups in Looker to speed up SQL queries

Who Needs to Attend

Data developers who are responsible for data curation and management within their organizations; Data analysts interested in learning how data developers use LookML to curate and manage data in their organization's Looker instance.

Prerequisites

- Basic understanding of SQL, Git, and the Looker business user experience.
- For learners with no previous experience as data explorers in Looker, it is recommended to first complete Analyzing and Visualizing Data in Looker.
