

MICROSOFT ACCESS 365: PART 1

Course Code: 821470

By the end of this course, users should be comfortable with navigating the Microsoft Access interface, creating a new database from scratch, querying a database, generating reports, sharing data, and much more.

Access is Microsoft's flagship database application that allows you to create and manage databases for all sorts of different purposes. This version of Access incorporates a few new features to better visualize data, support for new datatypes, as well as interface and workflow improvements.

Most of the features Microsoft incorporated in Office 2019 already exist in Office 365. Office 365 is a great solution for those looking for Office 2019 Training.

What You'll Learn

- Getting Started with Access
- Working with Table Data
- Query a Database
- Create Advanced Queries
- Generate Reports
- Design a Relational Database
- Joining Tables
- Importing and Exporting Data

Who Needs to Attend
