

# DEVELOPING ADVANCED AUTOMATION WITH RED HAT ANSIBLE AUTOMATION PLATFORM (AU374)

Course Code: 821562

AU374 (Replacing DO374) - Advance your Ansible skills and develop automation that scales by applying recommended practices with the new, container focused tools from Red Hat Ansible Automation Platform

Developing Advanced Automation with Red Hat Ansible Automation Platform (AU374) is designed for automation content developers to leverage the new, container focused tools from Red Hat Ansible Automation Platform to efficiently develop automation that can be managed by the automation controller. Learn recommended practices for automation development using reusable code, advanced playbook techniques, shared execution environments, and preparing for scalable automation with the automation content navigator.

This course is based on Red Hat Ansible Automation Platform 2.5.

Following course completion, hands-on lab access will remain available for up to 45 days for any live course that includes a virtual environment.

**Note:** This course is offered as a four day in person class, a five day virtual class or is self-paced.

## What You'll Learn

After completing this course, learners should be able to:

- Leverage capabilities of the automation content navigator to develop Ansible Playbooks.
- Apply recommended practices for effective and efficient automation with Ansible.
- Use advanced features of Red Hat Ansible Automation Platform to work with data, including filters and plugins.
- Perform automation operations as rolling updates.
- Create automation execution environments to bundle and distribute the dependencies needed to run automation code.

## Who Needs to Attend

This course is designed for users who create automation content, including these roles:

- Developers
- DevOps engineers
- Linux system administrators
- Other IT professionals with basic expertise using Red Hat Ansible Automation Platform to automate, provision, configure, and deploy applications and services in a Linux environment

## Prerequisites

Recommended :

- Having followed Red Hat Enterprise Linux Automation with Ansible (RH294), , or demonstrate equivalent Ansible experience
- Be a Red Hat Certified Engineer (RHCE®) on Red Hat Enterprise Linux, or demonstrate equivalent Ansible experience

Confirmation of the correct skill set knowledge can be obtained by passing the online skills assessment at [Red Hat Skills Assessment](#)

# DEVELOPING ADVANCED AUTOMATION WITH RED HAT ANSIBLE AUTOMATION PLATFORM (AU374)

CLASSROOM LIVE

\$4,700 USD

4 Day

## Classroom Live Outline

### **Develop Playbooks with Ansible Automation Platform 2**

- Develop Ansible Playbooks following recommended practices with Red Hat Ansible Automation Platform 2.

### **Manage Content Collections and Execution Environments**

- Run playbooks that use content collections not included in ansible-core, either from an existing execution environment or by downloading them from the automation hub.

### **Run Playbooks with Automation Controller**

- Use the automation controller to run playbooks that you developed with automation content navigator.

### **Work with Ansible Configuration Settings**

- Examine and adjust the configuration of automation content navigator and the Ansible runner inside execution environments to simplify development and troubleshoot issues.

### **Manage Inventories**

- Manage inventories by using advanced features of Ansible.

### **Manage Task Execution**

- Control and optimize the execution of tasks by Ansible Playbooks.

### **Transform Data with Filters and Plugins**

- Populate, manipulate, and manage data in variables using filters and plugins.

### **Coordinate Rolling Updates**

- Use advanced features of Ansible to manage rolling updates in order to minimize downtime and to ensure maintainability and simplicity of Ansible Playbooks.

### **Create Content Collections and Execution Environments**

- Write your own Ansible Content Collections, publish them, embed them in a custom execution environment, and run them in playbooks by using the automation controller.

5 Day

## Virtual Classroom Live Outline

1. **Develop Playbooks with Ansible Automation Platform 2**
  - Develop Ansible Playbooks following recommended practices with Red Hat Ansible Automation Platform 2.
2. **Manage Content Collections and Execution Environments**
  - Run playbooks that use content collections not included in ansible-core, either from an existing execution environment or by downloading them from the automation hub.
3. **Run Playbooks with Automation Controller**
  - Use the automation controller to run playbooks that you developed with automation content navigator.
4. **Work with Ansible Configuration Settings**
  - Examine and adjust the configuration of automation content navigator and the Ansible runner inside execution environments to simplify development and troubleshoot issues.
5. **Manage Inventories**
  - Manage inventories by using advanced features of Ansible.
6. **Manage Task Execution**
  - Control and optimize the execution of tasks by Ansible Playbooks.
7. **Transform Data with Filters and Plugins**
  - Populate, manipulate, and manage data in variables using filters and plugins.
8. **Coordinate Rolling Updates**
  - Use advanced features of Ansible to manage rolling updates in order to minimize downtime and to ensure maintainability and simplicity of Ansible Playbooks.

## 9. **Create Ansible Content Collections and Execution Environments**

- Write your own Ansible Content Collections, publish them, embed them in a custom execution environment, and run them in playbooks by using the automation controller.
