

# MAC INTEGRATION BASICS 12

Course Code: 821575

Learn Mac Integration Basics 12.

Organizations are increasingly integrating Mac computers into Windows or other standards-based network environments. But users and the IT professionals who support them can relax, because Mac integration is not complicated.

## What You'll Learn

After completing the Mac Integration Basics 12, students will be able to:

- Integrate a Mac into a Windows network environment.
- Configure a Mac to work with Active Directory.
- Take advantage of network services, file sharing, printing, instant messaging, email, calendars, and contacts.
- Provide security at the user, local-networking, and remote networking levels.
- Migrate data from a Windows computer to a Mac.
- Back up data.
- Run Windows programs on a Mac

## Who Needs to Attend

- Users who bring a Mac into organizations that predominantly use the Microsoft Windows operating system and Windows Server Essentials
- Users who replace a Windows computer with a Mac 2
- IT professionals who support Mac users in organizations that predominantly use Windows and Windows Server Essentials

## Prerequisites

To have the best learning experience with this course, students should understand how to use a Mac, a Windows computer, and computer peripherals.
