

# IBM ENGINEERING WORKFLOW MANAGEMENT FOR CONFIGURATION MANAGERS

Course Code: 821621

## QN1012G - IBM Engineering Workflow Management for Configuration Managers

The Engineering Workflow Management Administration for Configuration Managers 1-day course is designed to provide students with the knowledge to configure Engineering Workflow Management version control and build areas so that change and release management can be effectively adopted by the project team. Topics include ELM, EWM Source Control, Managing the Build Component, and Managing Reports.

### What You'll Learn

Upon completion of the Engineering Workflow Management Administration for Configuration Managers course, students will be able to:

- Define how ELM is used
- Configure project artifacts in source control
- Understand change flow and how to organize an efficient project hierarchy
- Use the source control command-line interface
- Describe the build architecture
- Understand build objects
- Monitor build results

### Who Needs to Attend

The QN1012G – GK821621 course is targeted to SCM Administrators.

### Prerequisites

Students should :

- Understand basic software development principles
- Understand basic project planning principles
