TURBONOMIC ARM FOUNDATIONS

Course Code: 821643

ACE ARM Training is intended to help you better understand the Turbonomic approach and features of Turbonomic 8 to manage your full application stack.

In this course, you learn how to assure application performance by using Turbonomic, navigate the user interface, and configure Turbonomic for the needs of your environment. You simulate "what if'" scenarios using the Turbonomic platform, and learn how to maintain your instance of Turbonomic.

What You'll Learn

Students will learn to,

- Describe the the ARM problem and how Turbonomic solves it
- Understand Turbonomic's analytics
- Configure Turbonomic to implement standard use cases
- Run a variety of simulations using the planner

Who Needs to Attend

This course is designed for anyone who wants to understand the Turbonomic approach to managing the datacenter.
