

AGILE FOR PRODUCT OWNERS

Course Code: 831017

Learn about the Product Owner role in Agile Frameworks and how to manage what gets built on your teams.

Agile Frameworks improve time-to-market and quality by creating closely formed teams consisting of both business representatives and delivery roles. The Product Owner is responsible for working with stakeholders to determine what gets built next, and manages the feature flow of the team. This course introduces you to Scrum and other Agile Frameworks, the role of the Product Owner, and how they fit within an Agile team.

You'll learn about a variety of Agile methodologies, the difference between project and product focus, how to write and manage user stories, how scope-based management changes delivery timelines, identifying aspects of requirements to ensure quality stories, and estimation, tracking, and forecasting your team's outcomes.

What You'll Learn

- Agile vs Waterfall methodologies
- Lean, Scrum, and Kanban
- Agile Leadership structures
