

PRINCE2® PROJECT MANAGEMENT FOUNDATION AND PRACTITIONER

Course Code: 831132

The course explains the PRINCE2® framework and illustrates effective utilization of the PRINCE2® framework within real projects, emphasizing tangible results and strategic implementation.

The primary objective of this combination course is to equip delegates with an extensive knowledge base and hands-on comprehension of the PRINCE2® 7th edition project management method. It also aims to assist participants in their preparation for both the PRINCE2(R)7 Foundation and Practitioner examinations, each of which includes a web proctored exam voucher as part of the course fee.

PRINCE2® has evolved into the ultimate standard for best practice methodology in project-based work, and its 7th edition is perfectly aligned with the realities of today's world. As a result, an increasing number of employers are seeking certification for project leaders. Clients expect you to have a profound understanding of project management. This involves being familiar with the roles within a project organization and how communication channels are structured. Additionally, you are required to possess insight into how tasks are presented and delivered in the form of work packages. Moreover, you should be acquainted with the various processes, control mechanisms, and reports that hold significance in your field of work.

Organizations that have embraced PRINCE2® have reported heightened project success rates, bolstered control mechanisms, and a substantial boost in customer satisfaction.

What You'll Learn

Day 1-3: Foundation

- Understand key concepts relating to projects and PRINCE2
- Understand how the PRINCE2 principles underpin the PRINCE2 method
- Understand the importance of people in successful projects
- Understand the PRINCE2 practices and how they are applied throughout the

project

- Understand the PRINCE2 processes and how they are carried out throughout the project

Day 4-5: Practitioner

- Demonstrate a wider appreciation of PRINCE2 skills and know-how, and apply this in a realistic context
- Efficiently navigate the PRINCE2 7 Official Book
- Tailor best practice in response to different project circumstances
- Analyse information and reason whether a course of action is effective/appropriate in accordance with PRINCE2 best practice
- Apply PRINCE2 method to your own projects
- Complete the PRINCE2 Practitioner examination

Who Needs to Attend

This course is aimed at aspiring project managers, practicing project managers and program managers. Line managers with project management responsibilities or looking to advance their careers can also benefit from this training and certification.

Prerequisites

While formal prerequisites for attending this course are not mandatory, a foundational understanding of project management would greatly benefit participants.
