

# DASA DEVOPS PRODUCT OWNER – INCLUDING EXAM

Course Code: 831189

Bridging business and IT to maximize product value through effective backlog management and DevOps practices

Maximize product success in DevOps environments. The DASA DevOps Product Owner Certification gives you the skills, mindset, and behaviors to integrate business and IT, manage backlogs effectively, and ensure customer needs are translated into high-value digital products and services. Learn how to drive value creation in high-speed, high-impact digital environments.

The course aims to standardize the team's knowledge and skills required to function effectively and helps you communicate with the team by understanding the common DevOps vocabulary such as CI/CD, test-driven development, cross-functional teams, and iterative development.

## What You'll Learn

After completing this program, you will be able to:

- Understand the concepts of Agile and Scrum.
- Understand the Scrum framework, including roles, events, the importance of backlog, and the definition of done.
- Understand the role of the Product Owner.
- Discuss the role and characteristics of the DevOps team.
- Explain the main competencies of the Product Owner.
- Describe what a Product Owner does in practice.
- Explain the Product Owner's work.
- Discuss the importance of delivering value.
- Identify the Product Vision techniques.
- Discuss how to engage and influence stakeholders to maximize value.
- Outline various Agile estimation techniques used by Product Owners.
- Explain the role of the Product Owner in managing Product Backlog.
- Discuss a few challenging situations of a Product Owner.

## Who Needs to Attend

The DASA DevOps Product Owner qualification is primarily aimed at:

- Existing Product Owners without certification
- Business Project Managers
- Business Executives

- Business Managers
- Business Information Managers
- Business Analysts
- Operations Managers
- Enterprise Architects

## Prerequisites

Basic familiarity with Agile, Scrum, and DevOps is beneficial.
