

MIGRATE AND MODERNIZE SAP IN THE MICROSOFT CLOUD (AZ-1006)

Course Code: 834042

Explore backup, disaster recovery, and monitoring of SAP systems in Azure.

This 1-day course teaches IT professionals who have experience with SAP solutions how to use Azure resources that include setting up and configuration of SAP environments in Azure for virtual machines, virtual networks, storage accounts, and Microsoft Entra ID. Learners will also explore backup, disaster recovery, and monitoring of SAP systems in Azure. Learn through the application of concepts, scenarios, and procedures through hands-on labs using Azure Center for SAP solutions.

What You'll Learn

- Modernize and explore Azure for SAP workloads
- Modernize and explore the foundations of IaaS for SAP on Azure
- Modernize and explore the foundations of identity and governance for SAP on Azure
- Modernize and deploy SAP on Azure
- Modernize, ensure business continuity, and implement disaster recovery for SAP solutions on Azure
- Modernize and migrate SAP workloads to Azure
- Modernize, monitor, and troubleshoot Azure for SAP workloads

Who Needs to Attend

Administrators of SAP systems that run on Azure should take this course. Before taking this course, candidates should pass the Azure Administrator (AZ-104) or Azure Infrastructure Solutions (AZ-305) exam and have completed training in SAP HANA or SAP NetWeaver.

CLASSROOM LIVE

\$675 USD

1 Day

Classroom Live Outline

Module 1: Modernize and explore Azure for SAP workloads

- Modernize and explore Azure for SAP workloads
- Modernize and identify SAP-certified configurations
- Modernize and examine SAP S/4HANA on Azure Virtual Machines

Module 2: Modernize and explore the foundations of IaaS for SAP on Azure

- Modernize and explore Azure for SAP compute
- Modernize and explore Azure network for SAP
- Modernize and explore Azure for SAP storage

Module 3: Modernize and explore the foundations of identity and governance for SAP on Azure

- Modernize and explore identity services for SAP on Azure
- Modernize and explore governance and manageability for SAP on Azure

Module 4: Modernize and deploy SAP on Azure

- Modernize and deploy single-instance implementations of SAP on Azure (2-tier and 3-tier)
- Modernize and implement high availability in SAP NetWeaver with AnyDB on Azure Virtual Machines
- Modernize and explore Azure Center for SAP solutions

Module 5: Modernize, ensure business continuity, and implement disaster recovery for SAP solutions on Azure

- Modernize and implement high availability for SAP workloads in Azure
- Modernize and implement disaster recovery for SAP workloads in Azure
- Modernize, perform backups and restores for SAP workloads on Azure

Module 6: Modernize and migrate SAP workloads to Azure

- Modernize, use the planning and deployment checklist for SAP workloads on Azure

Module 7: Modernize, monitor, and troubleshoot Azure for SAP workloads

- Modernize and explore monitoring requirements of Azure for SAP workloads
