

Course Code: 834059

Gain comprehensive knowledge and hands-on experience in building declarative agents using Visual Studio Code and Teams Toolkit.

This course provides comprehensive knowledge and hands-on experience in building declarative agents using Visual Studio Code and Teams Toolkit. Participants start with an introduction to declarative agents, followed by practical labs that guide them through building their first agent, understanding API plugins, and implementing APIs. Advanced topics include creating adaptive cards, managing authentication for API plugins, and integrating Microsoft Graph connectors. By the end of the course, participants have a solid understanding of how to leverage declarative agents to enhance the functionality of Microsoft 365 Copilot.

Who Needs to Attend

Developers willing to build connectors and plugins for Microsoft 365 Copilot.

CLASSROOM LIVE

\$675 CAD

1 Day

Classroom Live Outline

Module 1: Introduction to declarative agents for Microsoft 365 Copilot

- What are declarative agents?
- How declarative agents work
- When to use declarative agents

Module 2: Build your first declarative agent using TypeSpec

- What is TypeSpec?
- Exercise Scaffold a new declarative agent
- Exercise Write instructions and conversation starters
- Exercise Integrate knowledge and actions

Module 3: Introduction to actions with API plugins for declarative agents

- What are API plugins for declarative agents?
- How API plugins work
- · When to use API plugins

Module 4: Build your first action for declarative agents with API plugin by using Visual Studio Code

- Create a declarative agent with an API plugin
- Exercise Create a declarative agent with an API plugin

Module 5: Use Adaptive Cards to show data in API plugins for declarative agents

- Return rich responses with Adaptive Cards
- Exercise Return rich responses with Adaptive Cards

Module 6: Authenticate your API plugin for declarative agents with secured APIs

Integrate an API plugin with an API secured with a key

- Exercise Integrate an API plugin with an API secured with a key
- Integrate an API plugin with an API secured with OAuth
- Exercise Integrate an API plugin with an API secured with OAuth

Module 7: Introduction to Copilot connectors

- What are Copilot connectors?
- Understand external connections and schemas
- Explore methods for data retrieval and transformation
- Understand access controls and data security

Module 8: Build your first Microsoft 365 Copilot connector using Visual Studio Code

- Exercise Create your first connector project
- Exercise Connect to GitHub repository
- Exercise Run connector and ingest data
- Exercise Add new property

Module 9: Monitor and maintain Microsoft 365 Copilot connectors

- Monitor and manage connector operations
- Troubleshoot connector issues and errors
- Manage access permissions and security
- Optimize connector performance
