

AI ESSENTIALS: QUICK START TO BASIC AI THEORY

Course Code: 840021

Equip basic skilled technical users with essential AI skills and knowledge for real-world application, enhancing practical AI understanding and capabilities.

Join us for a compelling half-day learning event designed to introduce basic skilled technical users to the transformative world of Artificial Intelligence (AI). Guided by an industry expert, this program offers a unique blend of insightful discussions, interactive activities, and practical case studies, aimed at deepening your understanding of AI and its application in real-world scenarios. You'll have the chance to get hands-on with prevalent AI technologies, engaging in light 'exposure-level' activities that will allow you to familiarize yourself with AI tools, enhancing your practical skills under expert guidance.

What You'll Learn

- **Grasp Essential AI Concepts:** Learn the basics of AI, machine learning, and deep learning, and understand their distinctions and real-world applications.
- **Stay Current with AI Advancements:** Keep up with the latest in AI technology and its impact across industries.
- **Leverage Data in AI:** Understand the critical role of data in AI development and how to use it effectively.
- **Ethical AI Use:** Explore ethical considerations in AI and develop awareness of reliability issues.
- **Practical AI Testing Skills:** Gain skills in testing and troubleshooting AI systems.
- **AI in Business:** Understand how AI is applied in business contexts and communicate its benefits effectively.

Who Needs to Attend

Ideal for IT professionals, developers, product managers, and technical individuals new to AI, looking to apply AI concepts in practical scenarios.

Prerequisites

Introductory, basic technical course

AI ESSENTIALS: QUICK START TO BASIC AI THEORY

Course Code: 840021

VIRTUAL CLASSROOM LIVE

\$299 USD

1 Day

Virtual Classroom Live Outline

- AI Unpacked: From Basics to Big Ideas
- Time Travel with AI: A Quick History Lesson
- Algorithms Unleashed: The Magic Behind AI
- Data Handling 101: Prepping for AI Success
- Learning Styles: How AI Gets Smarter
- Neural Networks: The Brainy Side of AI
- AI in Action: Changing the World One Industry at a Time
- From Ideas to Implementation: Building AI Systems
- The Ethics of AI: Making Smart Choices
- The Future is Now: Exciting AI Trends to Watch
