

SOLARWINDS PLATFORM ADMINISTRATION

Course Code: 841002

Our SolarWinds Platform Administration class is designed to cater to both new users and experienced professionals seeking to master the intricacies of the SolarWinds Platform.

Over four days, you'll delve deep into the five core modules, ensuring you have a robust grasp of their features and functionality.

This class is carefully structured to emphasize a thorough understanding of the essential features and functions of SolarWinds' core modules, making it ideal for those who wish to build a solid foundation in network management.

What You'll Learn

Gain invaluable skills to excel in the world of SolarWinds platform administration.

While we explore a multitude of crucial aspects in this class, please note that we do not delve into advanced topics such as database and deployment architecture, custom polling, SQL or SWQL scripting, advanced alerting, comprehensive reporting techniques, or the development of modern dashboards. These advanced subjects are extensively covered in our specialized SolarWinds Advanced Platform Administration class.

Who Needs to Attend

Students who want to Gain invaluable skills to excel in the world of SolarWinds platform administration.
