

PALO ALTO NETWORKS: PANAROMA CENTRALIZED NETWORK SECURITY ADMINISTRATION

Course Code: 842005

Designed to help students gain an introduction to configuring and managing Next-Generation Firewalls and Prisma Access using the Palo Alto Networks Panorama management server.

This course will help students gain experience configuring and managing Palo Alto Networks Panorama management servers. Administrators that complete this course should become familiar with the Panorama management server's role in managing and securing the overall network.

What You'll Learn

- Learn how to configure and manage the next-generation Panorama management server
- Gain experience configuring templates (including template variables) and device groups
- Activate, configure, and manage Prisma Access using Panorama

Who Needs to Attend

This course is intended for Security Administrators, Security Operations Specialists, Security Analysts

Prerequisites

Participants must be familiar with Palo Alto Networks next-generation firewall management and basic networking concepts, including routing and IP addressing. In addition, participants should complete the following pre-requisites to be optimally prepared for the course:

- Firewall Essentials: Configuration and Management or equivalent experience.
