

WORKSPACE ONE® UEM ADMINISTRATION AND OPERATE (OWS1UEMAO)

Course Code: 845001

This course is focused on understanding how various platforms are managed through Workspace ONE UEM. The primary objective of this session is to ensure confidence in the capabilities of Workspace ONE UEM and how it manages multiple platforms all in one place.

What You'll Learn

By the end of this session, attendees should be able to:

- Integrated core components of Workspace ONE UEM
- Demonstrate architectural understanding for how UEM components work together to provide a solution
- Grasp core management capabilities on each platform (iOS, Android, Windows)
- Understand how to streamline the onboarding, enrollment and provisioning process for each platform
- Configure Workspace ONE Tunnel to ensure secure access to corporate resources
- Deploy Android Enterprise in work managed or COPE mode
- Implement multi-user on Windows 11
- Deploy Apps-on-Demand with a view to maintaining redundancy and enhancing manageability in a multi-site Enterprise.
- Facilitate and manage the end-user experience for Microsoft Windows Users using Dynamic Environment Manager.
- Integrate with ThinApp to help with legacy application and platform challenges.

Who Needs to Attend

- Systems Engineers
- Consulting Architects
- Microsoft End-User Computing Specialists

Prerequisites

Recommended:

- Omnissa Certified Professional – Workspace (OCPW)

- Level 100 understanding of Workspace ONE UEM
