GUARDIUM DATA PROTECTION - MONITORING DATA END TO END

Course Code: 900019

Explore Guardium Data Protection - Monitoring data end to end.

This IBM Self-Paced Virtual Class (SPVC) includes:
- PDF course guide available to attendee during and after course
- Lab environment where students can work through demonstrations and exercises at their own pace

IBM Security® Guardium® Data Protection (Guardium) is a scalable data security platform that meets the demands of modern environments. It discovers and classifies sensitive data from across an enterprise, providing real time data activity monitoring and advanced user behavior analytics to help discover unusual activity around sensitive data.

Guardium provides a broad range of data security and protection capabilities that can protect sensitive and regulated data across environments and platforms. This course provides the processes, procedures, and practices necessary to configure Guardium to monitor and protect sensitive data.
This course is a subset of the 3-day course IBM Security Guardium Data Protection Foundations. Administrators who need in-depth Guardium training should enroll in 8G102G, which is instructor-led, or 8G102XG, which is self-paced.

What You'll Learn
- Configure policy rules that process the information that is gathered from database and file servers
- Create Guardium queries and reports to examine trends and gather data
- Use Guardium alerts to monitor a data environment

Who Needs to Attend

This course is designed for database administrators, security administrators, and security analysts who are monitoring Guardium data.

Prerequisites

Before taking this course, make sure that you have general knowledge of the Guardium Data Protection user interface.

GUARDIUM DATA PROTECTION - MONITORING DATA END TO END

Course Code: 900019

ON-DEMAND	$1,120 CAD

On-Demand Outline

Module 1

- Policy management

Module 2

- Guardium reporting

Module 3

- Guardium alerts
