

# IMPLEMENTING MONITOR IN MAXIMO APPLICATION SUITE

Course Code: 900031

Learn to set up devices and dashboards, and how to work with prioritizing alerts and automated Anomaly detection.

In this course, you will be introduced to the concepts of Maximo Monitor, how to set up devices and dashboards, and how to work with prioritizing alerts and automated Anomaly detection. You will also learn about condition monitoring for intelligent asset management, extending and integrating Monitor with the third party IoT platforms, and Edge Data collector.

## What You'll Learn

After completing this course, you should be able to:

- Explain the key benefits and processing options in Monitor.
- Describe the architecture and the process in Monitor.
- Identify device types and set up device.
- Work with prioritizing alerts in Monitor.
- Work with Automated Anomaly detection.
- Setting up and configuring dashboards in Monitor.
- Explain Condition Monitoring for intelligent Asset Management in Monitor.
- Discuss integration and extending Monitor functions with third party IoT platforms.
- Describe Edge Data Collector in Monitor.

## Who Needs to Attend

Implementation Consultants, Administrators, Technical Sales, System Users

# IMPLEMENTING MONITOR IN MAXIMO APPLICATION SUITE

Course Code: 900031

VIRTUAL CLASSROOM LIVE

\$950 USD

1 Day

## Virtual Classroom Live Outline

### **Module 1: Introduction to Maximo Monitor**

- Need for Monitor
- Monitor Overview
- Key Benefits
- The Path to Value
- Maximo Monitor Functions

### **Module 2: Monitor Architecture and Process**

- Monitor Architecture
- Maximo Monitor Process

### **Module 3: Devices and Dashboards**

- Devices and Device Types
- Device Dashboard and Summary Dashboard
- Dashboard Cards
- Third Party Dashboard Card
- E2E flow for Streaming Data Devices

### **Module 4: Alerts and Automated Anomaly Detection**

- Need for Anomaly Detection
- Anomaly patterns
- Anomaly detection life cycle
- Unsupervised and supervised anomaly detectors
- Types of Alerts
- Alert Prioritization
- Built-in Functions

### **Module 5: Device Setup, Dashboards and Alerts**

- Demonstration: Device Setup, Dashboards and Alerts

### **Module 6: Automated Anomaly Detections and Alerting**

- Demonstration: Automated Anomaly Detections and Alerting

- Student Exercises:
- Exercise 1 Create a Device type and add a Device in Monitor
- Exercise 2 Set up Alerts
- Exercise 3 Connect Maximo Monitor to Maximo Manage
- Exercise 4 Set up data simulator in IoT platform
- Exercise 5 Simulate alert condition and create a Service Request
- Exercise 6 Set up Anomaly Detectors
- Exercise 7 Set up Summary Dashboard and simulate anomalies

### **Module 7: Streaming Metrics and Hierarchy**

- Demonstration: Streaming Metrics and Hierarchy

### **Module 8: Condition Monitoring**

- Demonstration: Condition Monitoring
- Student Exercises: Script with Action Launch Point
- Exercise 8 Set up Manage for Condition Monitoring
- Exercise 9 Manage integration with Monitor using MAS Data Dictionary
- Exercise 10 Trigger Work Order generation from sensor data

### **Module 9: Edge Data Collector and Monitor Integrations Concepts**

- Introduction to Edge Data Collector
- Introduction to Azure IoT Integration with Monitor

Jun 1 - 1, 2026 | 9:30 AM - 5:30 PM EDT

Oct 5 - 5, 2026 | 9:30 AM - 5:30 PM EST

Dec 7 - 7, 2026 | 9:30 AM - 5:30 PM EST

# IMPLEMENTING MONITOR IN MAXIMO APPLICATION SUITE

Course Code: 900031

ON-DEMAND

\$600 USD

## On-Demand Outline

### **Module 1: Introduction to Maximo Monitor**

- Need for Monitor
- Monitor Overview
- Key Benefits
- The Path to Value
- Maximo Monitor Functions

### **Module 2: Monitor Architecture and Process**

- Monitor Architecture
- Maximo Monitor Process

### **Module 3: Devices and Dashboards**

- Devices and Device Types
- Device Dashboard and Summary Dashboard
- Dashboard Cards
- Third Party Dashboard Card
- E2E flow for Streaming Data Devices

### **Module 4: Alerts and Automated Anomaly Detection**

- Need for Anomaly Detection
- Anomaly patterns
- Anomaly detection life cycle
- Unsupervised and supervised anomaly detectors
- Types of Alerts
- Alert Prioritization
- Built-in Functions

### **Module 5: Device Setup, Dashboards and Alerts**

- Demonstration: Device Setup, Dashboards and Alerts

### **Module 6: Automated Anomaly Detections and Alerting**

- Demonstration: Automated Anomaly Detections and Alerting

- Student Exercises:
- Exercise 1 Create a Device type and add a Device in Monitor
- Exercise 2 Set up Alerts
- Exercise 3 Connect Maximo Monitor to Maximo Manage
- Exercise 4 Set up data simulator in IoT platform
- Exercise 5 Simulate alert condition and create a Service Request
- Exercise 6 Set up Anomaly Detectors
- Exercise 7 Set up Summary Dashboard and simulate anomalies

### **Module 7: Streaming Metrics and Hierarchy**

- Demonstration: Streaming Metrics and Hierarchy

### **Module 8: Condition Monitoring**

- Demonstration: Condition Monitoring
- Student Exercises: Script with Action Launch Point
- Exercise 8 Set up Manage for Condition Monitoring
- Exercise 9 Manage integration with Monitor using MAS Data Dictionary
- Exercise 10 Trigger Work Order generation from sensor data

### **Module 9: Edge Data Collector and Monitor Integrations Concepts**

- Introduction to Edge Data Collector
- Introduction to Azure IoT Integration with Monitor
