

IBM Z SYSTEM AUTOMATION 4.3 OPERATIONS

Course Code: 900054

Learn IBM Z System Automation (SA for z/OS) commands that are used for system operations.

This course introduces and explains the IBM Z System Automation (SA for z/OS) commands that are used for system operations. In this course, the System Automation Manager and Automation Agent run in a z/OS 2.4 environment. The automation platform, IBM Z Netview is at version 6 release 4 and IBM Z System Automation is at version 4 release 3. The course uses several automation scenarios in single and multisystem configurations to demonstrate the concepts that are taught in the lessons. This training class is delivered in an environment with multiple opportunities for hands-on lab exercises.

What You'll Learn

When you complete this course, you can use IBM Z System Automation 4.3 to perform the following tasks:

- Start and stop automated resources
- Monitor and control automated resources
- IPL and shut down systems and an SAplex

Who Needs to Attend

Users of IBM Z System Automation, especially operators, administrators, and system programmers.

Prerequisites

- Basic z/OS operations skills
- Basic NetView skills helpful

IBM Z SYSTEM AUTOMATION 4.3 OPERATIONS

VIRTUAL CLASSROOM LIVE \$3,800 USD

1 Session

Virtual Classroom Live Outline

- Module 1: Introduction to IBM Z System Automation (level set only)
- Module 2: Initialization
- Module 3: Commands and operations
- Module 4: Application groups
- Module 5: Application monitoring
- Module 6: Centralized operations
- Module 7: Troubleshooting
