

# PALO ALTO NETWORKS: PANORAMA: MANAGING FIREWALLS AT SCALE (EDU-220)

Course Code: 9798

Learn how to configure and manage the Panorama Management Server.

This course should help students to gain in-depth knowledge about how to configure and manage their Palo Alto Networks Panorama management server. Administrators that complete this course should become familiar with the Panorama management server's role in managing and securing their overall network. Network professionals will be shown how to use Panorama aggregated reporting to provide them with a holistic view of a network of Palo Alto Networks next-generation firewalls.

## What You'll Learn

- Learn how to configure and manage the next-generation Panorama management server
- Gain experience configuring templates (including template variables) and device groups
- Gain experience with administration, log collection, and logging and reporting
- Gain experience with Panorama High Availability and Panorama troubleshooting
- Become familiar with new Panorama features such as Panorama in the public cloud, the Logging Service, and GlobalProtect cloud service

## Who Needs to Attend

- Security administrators
- Security analysts
- Network professionals
- Security engineers
- Network engineers
- Support staff

## Prerequisites

Students must have completed the Firewall Essentials: Configuration and Management (EDU-210) class. Students must be familiar with Palo Alto Networks

next-generation firewall management and basic networking concepts, including routing and IP addressing.
