

CISM (CERTIFIED INFORMATION SECURITY MANAGER) PREPARATION COURSE

Course Code: 9817

Prepare for the ISACA CISM certification exam.

Designed for IT professionals with technical expertise and experience in IS/IT security and control looking to transition from team player to manager. CISM can add credibility and confidence to interactions with internal and external stakeholders, peers and regulators.

This certification indicates expertise in information security governance, program development and management, incident management and risk management. If you are a mid-career IT professional aspiring to senior management roles in IT security and control, CISM can get you the visibility you need.

What You'll Learn

In-depth coverage of the four domains required to pass the CISM exam:

1. Information Security Governance
2. Information Risk Management
3. Information Security Program
4. Incident Management

Who Needs to Attend

CISM is intended for information security professionals with at least five years of relevant work experience and at least three years in the role of information security manager.

Job titles include:

- CISO
- CSO
- Security Director/Manager/Consultant
- IT Director/Manager/Consultant
- Compliance/Risk/Privacy Director and Manager
